**BUSINESS CONTINUITY PLAN & DISASTER RECOVERY PLAN
FOR
HATTERAS INVESTMENT PARTNERS, LP
HATTERAS CAPITAL DISTRIBUTORS, LLC
OVERVIEW**

Hatteras Investment Partners, LP, Hatteras Capital Distributors, LLC (“HCD”), and the Hatteras Funds (collectively referred to here as “Hatteras”) are under common control and the management of Hatteras, and have adopted and implemented this Business Continuity Program and Disaster Recovery Plan (together the “BCP” or “Plan”) described herein. The BCP or Plan is designed to comply with FINRA Rule 4370 (“Business Continuity Plans and Emergency Contact Information”), as applicable and to help ensure that the essential advisory activities and business operations performed by Hatteras for its clients, which include unregistered pooled investment vehicles and registered investment companies (together, the “Funds”), can continue in the face of unanticipated circumstances or occurrences inclusive of pandemics which could render the normal systems, operations, procedures, sites and staff either internally or with key service providers inoperable. The BCP/Plan is administered by the Director of Operations and the Emergency Contacts include the CEO (Primary) and Director of Operations (Secondary). - **Technology Associates** – Cybersecurity Vendor and Managed Service Provider to Hatteras.

In the event of a disaster or interruption of the Funds' normal systems, processes and operations, certain areas of the daily operations of the Funds would be impacted in a greater manner than others (*i.e.*, Fund Accounting, Transfer Agency functions and Custodial services). These functions are integral to the daily creation of the Fund's Net Asset Value, and the processing of shareholder transactions, either directly or indirectly from third party distribution sources. As such, the disaster recovery procedures for the Funds' service providers are more extensive than for other non-daily essential functions.

The Advisor, Sub-Advisor, Administrator and Distributor, do not always have specific actions and tasks necessary to be performed on a daily basis to ensure the timely and accurate processing of the Fund's NAV and shareholder transactions. As such, the disaster recovery procedures for the Funds' service providers are more oriented toward re-establishing phone and internet communications with other key vendor areas.

It should be noted that with the various service providers to the Funds having offices in a broad geographic dispersion across the U.S., the opportunity for a localized 'disaster event' to affect all Fund functions is minimized.

II. FIRM POLICY

It is policy to respond to a Significant Business Disruption (SBD) by safeguarding employees' lives and firm property, making a financial and operational assessment, quickly recovering and resuming operations, protecting all of the firm's books and records, and allowing our customers to transact business. In the event that we determine we are unable to continue our business; we will assure customers' prompt access to their funds and securities.

A. Significant Business Disruptions (SBDs)

Our plan anticipates two kinds of SBDs, internal and external. Internal SBDs affect only our firm's ability to communicate and do business, such as a fire in our building. External SBDs prevent the operation of the securities markets or a number of firms, such as a terrorist attack, pandemic, a city flood, disruption to the power grid, or a wide-scale, national or regional disruption. Our response to an external SBD relies more heavily on other organizations and systems, especially on the capabilities of our administrator and custodian.

B. Approval and Execution Authority

David Perkins is responsible for approving the plan and for ensuring that the required annual review is conducted. David Perkins or Brittney Chick-Reny is responsible for executing this BCP.

C. Plan Location and Access

VII. FINANCIAL AND OPERATIONAL ASSESSMENTS

A. Operational Risk

In the event of an SBD, we will immediately identify what means will permit us to communicate with our customers, employees, critical business constituents, critical banks, critical counterparties, and regulators. Although the effects of an SBD will determine the means of alternative communication, the communications options we will employ will include our Web site, telephone, cellular phone, voice mail, and secure e-mail. In addition, we will retrieve our key activity records as described in the section above, Data Back-Up and Recovery (Hard Copy and Electronic).

B. Financial and Credit Risk

In the event of an SBD, we will determine the value and liquidity of our investments and other assets to evaluate our ability to continue to fund our operations. We will contact our custodian and administrator, critical banks, and investors to apprise them of our financial status. If we determine that we may be unable to meet our obligations to those counterparties or otherwise continue to fund our operations, we will request additional financing from our bank or other credit sources to fulfill our obligations to our customers and clients. If we are unable to meet our financial commitments, we will immediately take appropriate steps, including:

- 1) Contact our investors by phone, mail, or by posting a notice on our website at <http://www.hatterasinvestmentpartners.com>; or a combination of these communications methods will be employed to apprise our clientele of our financial status.

We have primary responsibility for establishing and maintaining our business relationships with our customers and have sole responsibility for our mission critical functions. Our custodian provides, through contract, the execution, comparison, allocation, clearance and settlement of transactions, the maintenance of customer accounts, access to customer accounts, and the delivery of funds.

A. Our Firm's Mission Critical Systems

Subscription and Redemption Processing

Currently, the Transfer Agent receives subscriptions from customers via completed subscription documents by the customer. During an SBD, either internal or external, we will continue to take subscriptions through any methods that are available and reliable, and in addition, as communications permit, we will inform our customers when communications become available to tell them what alternatives they have to send their requests. Customers will be informed of alternatives by phone, voicemail, or by an answering machine.

B. Mission Critical Systems Provided by Our Custodian

Our firm relies, by contract, on our outsourced custodian and administration firms to provide order execution, order comparison, order allocation, the maintenance of customer accounts, and access to customer accounts.

A. Customers

We now communicate with our customers using the telephone, e-mail, video conferencing, fax, U.S. mail, courier, and in person visits at our firm or at the other's location. In the event of an SBD, we will assess which means of communication are still available to us and use the means closest in speed and form (written or oral) to the means that we have used in the past to communicate with the other party. For example, if we have communicated with a party by e-mail but the Internet is unavailable, we will call them on the telephone and follow up where a record is needed with paper copy in the U.S. mail.

B. Employees

HATTERAS

We will quickly establish alternative arrangements if a business constituent can no longer provide the needed goods or services when we need them because of a SBD to them or our firm. A current list of service providers and contact information is maintained by the Office Manager.

B. Banks
